Safety switches and enclosed switch-disconnectors

Safe and dependable performance

Reliable in extreme conditions

All our enclosed safety switches are built to last and resist the wear of harsh operating conditions. The enclosures are made of high-quality, UV-resistant materials and the degree of protection is IP65. All switches are suitable for use both indoors and outdoors.

Safety and protection

Our design is based on ensuring safety and preventing electrical accidents. To make maintenance and installation as safe as possible, we have included features such as padlockable handles, cover interlocks and gas pressure relief functions to our products.

Speed up your project

We can help speed up your project by making the selection of the right switch as quick and easy as possible. Our web-based selection tool, e-Configure, enables you to select the best switch for your particular application in the easiest way possible.

Safety switches and enclosed switch-disconnectors

Overview

Side operated, type BW_, LBAS_, KSF_, KSE_

- Degree of protection: IP65, IEC 60529
- Degree of protection without cover: IP20
- Enclosure in PBT (Thermoplastic polyester) plastic, high impact strength and chemical resistant
- Flame class UL94 5VA, Glow wire 850 ° (IEC 60695-2-12)
- Resistance against UV-radiation: F 1, UL 746C
- Standard IEC 60947-3 for Switch-disconnectors
- European Standard EN60204 Safety of machinery
- Cable outlets M sized threaded knock-outs
- 2-, 3-, 4- and 6-pole versions
- Light grey/dark grey enclosure with grey handle
- Yellow enclosure have red handle
- Handle indication I-O/ON-OFF
- Suitable for 3-, 4- and 5-wire systems

Front operated, type OTP

- Degree of protection: IP65, IEC 60529
- Degree of protection without cover: IP20, IEC 60529
- Self-extinguishing plastic: UL94 V0
- Resistance against UV-radiation: F 1, UL 746C
- Standard IEC 60947-3 for Switch-disconnectors
- European Standard EN60204 Safety of machinery
- Cable outlets M or Pg sized threaded knock-outs
- Also blank gland plates available
- 3-, 4- and 6-pole versions
- Black or red-yellow handle
- Handle indication I-O/ON-OFF
- Suitable for 4- and 5-wire systems

1 Metric threaded knockouts, IP54 cable glands sealing plugs included | 2 Knockout in the back of the box | 3 Space for auxiliary contacts, (N.O./N.C.) | 4 Handle, axis and switch insert is one system factory assembled. Switch insert UL94 V0 and glow wire 960 ° (IEC 60965-2-12) | 5 Knockout for ventilation / Water drain holes | 6 Cable strip length | 7 Isolated neutral terminal with separate in/out connection | 8 Handle padlockable in "O" position as standard. Knockout for padlock in "I" position. Shackle for 6 padlocks | 9 PE-terminal

1 Knock-out openings for M threads on the top and bottom, separate threaded knock-out opening for control wires in enclosure sizes width 130 mm and larger | 2 Terminals for 5-wire system: three phases + N + PE terminals | 3 Pull stoppers for two cables in 16 A enclosed switches | 4 Provision for sealing of the lid | 5 Enclosure mounting screws isolated from the inside housing | 6 Knock-out opening on the base for incoming cables | 7 Space for auxiliary contacts, (N.O./N.C.) (to be ordered separately)

Enclosed safety switches

Safe and dependable performance

Enclosed safety switches are designed to be used near motors or machines, to isolate them from the main circuit. Our enclosed safety switches support you in creating a safe working environment, reducing the risk of electrical and mechanical accidents, especially during maintenance and repair work.

We offer the widest portfolio of IEC standard switches (from 16 to 1200 A) in both side and front operated, with a range of pole and cable configurations. We also offer a full range of enclosure materials, including plastic, aluminum, steel sheet and acid-proof stainless steel to ensure you find the right safety switches for your application and operating environment.

Enclosed safety switches

For demanding operating conditions

Every aspect of our enclosed safety switches is designed for safety and dependable performance, even in demanding operating conditions. This helps ensure that machinery can't be accidentally started while maintenance is in progress.

Tried and tested performance

To ensure maximum safety, it is always good practice to use a separate switch for normal start and stop and to use the safety switch only during repair and maintenance. ABB's range includes side and front operated safety switches from 16 to 1200 Amperes, with power ratings from 7.5 to 1200 kW up to 690 V. The ratings correspond to utilization category AC-23A.

Enclosures are available in plastic, aluminum, steel sheet, stainless steel sheet and acid-proof material. The appropriate material can be selected according to preference or application. All our safety switches have been tested according to IEC 60947-3 standard. After rigorous testing, our safety switches have proven to maintain a high degree of safety.

Our safety switches are delivered with an auxiliary contact that can be used for electrical interlocking. This is done by connecting the safety switch to a starter or other motor control devices. For easy identification, each safety switch has a sticker label. For the most extreme operational conditions, corrosion-resistant gold plated auxiliary contacts are available upon request.

Ensured EMC safety

ABB's design also takes into consideration the need for reliable performance in environments with electromagnetic disturbances (EMC), with full compliance with IEC 61000-6-3/4 or EN 55011, according to EU directive 2004/108/EC. Electromagnetic compatibility (EMC) refers to the ability of a device to function despite electromagnetic disturbances in the environment without electromagnetically disturbing other devices in its surroundings. This is important in environments where the disturbance from frequency converters may rise up to tens, or even hundreds of MHz.

710/1250	1200/1250		1200	800	330	2	OT1250EUUR3AZ	1SCA103283R1001	73

Ring-flanges have to be ordered separately.

The ordering information for ring-flanges, see Accessories for EMC Safety switches.

The cables should be shielded to obtain proper EMC protection.

Ordering information

Steel sheet enclosed EMC safety switches

EMC safety switches with ring-flange cable entries, 6-pole, IP65, red-yellow handle

The delivery includes a red-yellow handle (I-O/ON-OFF) and PE-terminal. Auxiliary contacts are wired to the terminal blocks in sizes 200A...720A. Fixed cable entries with ring-flange entries. Entry plate fixing profiles are used also for mounting the safety switch. Cover interlock and defeatable interlock included.

Function table of auxiliary contacts

Handle position	Main contacts	Aux./Test contacts N.O.	Test indication contact N.O.
Test	open	closed	closed
0	open	open	open
I	closed	closed	open

Handle indications and functions

The handle indicates the position of the main contacts of the switch with complete reliability in all situations. If the contacts are welded together, the handle does not reach the OFF-position but remains between ON and OFF, maintaining the door interlock and preventing padlocking.

When operating the switch to the Test-position with a test handle, the test auxiliary contacts change position. The main contacts remain open.
